Welcome to Shop Stop Login

User Name	
Password	

Login

Login.html

1. Create a Web Application using HTML/Servlet/ JSP/MySQL/JDBC for demonstration of Login and Logout activities of a user. Perform **Session Handling** and implement Session expired activity if user is idle for 1 min. Use "CustomerRegistration" table created in previous sessions. Only Users registered in the "CustomerRegistration" will be able to Login otherwise it should display "Invalid User".
